

E BUSINESS

5TH :HTML

R05 Kanshin Fusa

1

OBJECTIVES

- To understand the basic structure HTML web page
- To write your own simple pages.
- To serve as the starting point for more advanced training on programming in HTML

About myself...

2023-9-13

Hi! My name is Kankishin. I work in NET Tsuyama, Japan.
I teach **Business**, which is a lecture for 5 grade students.

My favorite movie is Star Wars series.
"May the Force be with you!"

Let's Your father!

My favorite place is 鳥取県立美術館.

These are my hobbies:

- Watching soccer games
- Watching movies

Best movies for me:

1. Star Wars I-III, Rouge one
2. Lord of the rings
3. Forrest Gump

We have to reduce emission of CO₂.

The room of Kankishin dormitory is 4m².

Watch this page with this video. I wish you like it.

REVIEW: BASIS OF HTML WEB PAGE

- We have learnt following page in [Information System Engineering Experiments and Practice II]
- Html file consist of **TAGS** as elements
 - <!DOCTYPE html>: Announcement of this file, necessary
 - <html></html>: Start and end of the content
 - <head></head>: Information of this html file, CSS, JavaScript, etc.
 - <title></title>: The title of this html web page
 - <body></body>: The content to be illustrated in browser
 - Use CSS and element to insert space or line break

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
    <title>Hello World </title>
  </head>
  <body>
    <h1>This is a test page . </h1>
    <p><strong>Hello </strong>, World </p>
    <p>ハローワールド</p>
    
    <p> Written by ○○.</p>
  </body>
</html>
```

TO RUN HTML AS A WEB PAGE

- Create a new folder in PC
 - Note that your folder will be deleted if PC shuts down
- Open Visual Studio Code
 - Plugins -> search “open in browser” , install
 - Running html file in browser by [Alt + b] is available
 - [file] -> [Open folder as workspace] -> select the folder that you have created
 - Create a new file with name [helloWorld.**html**]
 - Add content of previous page from copy and paste
 - Note quotations, indentations
 - Alt + b to check it!
- Every time, create and run your html file in this way

MAKE A HOMEPAGE TO INTRODUCE YOURSELF (... IN ENGLISH)

- Create a new file with name [selfIntro.html]
 - Add content below

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
  </head>
  <body>

  </body>
</html>
```

TITLE, CAPTION, AND TIME

- Add title into your page

- In head element, add:

```
<title>Self Introduction</title>
```

- Add caption

- <h1> element (h one, not h L)

```
<h1>About myself...</h1>
```

- Add time

- Use <time> element to insert time or date
 - Use “datetime” attribute to indicate the time and/or date of the element

- The value will be machine-readable value of datetime, which can be calculated
 - Must be written in format, such as [yyyy-mm-dd hh:mm:ss.ms]

```
<time datetime="2023-09-13 12:00:00">2023-9-13</time>
```

Replace these
two times with
current time

PARAGRAPH, LINE BREAK

- Paragraphs
 - Use <p> element to make paragraph
 - Add your self introduction by <p> and </p>
 - Use
 to make new lines

```
<p>Hi! My name is Kanshin.  
    I work in NIT Tsuyama, Japan. <br>  
    I teach E business, which is a lecture for 5 grade students.  
</p>
```

- <Alt + b> to check your page!

CITATIONS

- Case you need to use citations:
 - Name of book, movie, etc.
 - Name of person, company, cooperation, etc.
 - Phrase from somebody or somewhere, etc.
- `<cite>` and `</cite>` for names, titles
- `<q>` and `</q>` for Phrase
- Add your favorite movie or Manga and its phrase into self introduction

Other examples:

- One piece: I'm going to become the king of the pirates!
- Jujutsu Kaisen: Don't worry! I'm crazy strong.

...

```
<p>  
    My favorite movie is <cite>Star Wars</cite> series. <br>  
    <q>May the Force be with you!</q>  
</p>
```

REPRESENTATION OF CHARACTERS: EMPHASIS

- To emphasize characters, you can use:
 - Boldface:
 - `` and ``, `` and ``
 - Boldface+oblique: `` ``
 - Marking: `<mark>` and `</mark>`
- Try these in your html of self introduction.

```
<p>Hi! My name is Kanshin.  
    I work in <b>NIT Tsuyama, Japan</b>. <br>  
    I teach <mark>E business</mark>, which is a lecture for 5 grade students.  
</p>  
<p>  
    My favorite movie is <cite>Star Wars</cite> series. <br>  
    <q>May the <strong>Force</strong> be with you!</q>  
</p>
```

REPRESENTATION OF CHARACTERS: SMALL CHARACTERS

- Superscript and subscript characters
 - `^{` and `}` for superscript
 - `_{` and `}` for subscript
 - Example: chemical formula CO₂ and size of area 2m²

```
We have to reduce emission of CO<sub>2</sub>.<br>
The room of Hokushin domitory is 4m<sup>2</sup>.
```

Try these elements to add your favorite place and copyright!

```
We have to reduce emission of CO2.
The room of Hokushin domitory is 4m2.
```

- Ruby characters
 - `<ruby>` for the characters and `<rt>` for Kana

```
My favorite place is <ruby>西条<rt>さいじょう</rt></ruby>
in <ruby>広島<rt>ひろしま</rt></ruby>.
```

```
My favorite place is さいじょう ひろしま
西 条 in 広 島.
```

- Small characters: `<small>` and `</small>`

```
<small>Copyright &copy; 1985-2023 NIT Tsuyama. All Rights Reserved.</small>
```

IMAGES

- Search an image for your favorite character
 - For example: Darth Vader of Star Wars
 - Save it into the folder of html files
- Add an image: element

```

```

- Src attribute: the URL path of the image file, **necessary**.
 - Width and height attribute: size of image in **pixel**.
 - Alt attribute: interpretation if the image cannot be shown normally.
- Try to insert the image that you have found into your page!

LINKS

Add your favorite character's link as practice!

- Transition to other pages: `<a>`

```
<a href="https://starwars.disney.co.jp/databank/character/darth-vader">  
I am your father.</a>
```

- Href attribute: URL of link
- Write the description of link between `<a>` and ``
- Write `` element between `<a>` and ``
to make image to be a link

- Something about URL

- Absolute path: URL of Internet
- Relative path: other pages in folder
 - For example(Assume there is a page of `darth-vader.html`): `To know more about Dart-Vader`
 - Write the path from the current page to object page

LIST

- Itemization with no sequence: `` and ``
 - `` for begin and `` for end of all items
 - `` and `` for each item
 - Marks can be change by css
- Itemization with numbers: ``
 - Use start attribute to adjust the numbers
 - For example: `<ol start="3">`

```
<p>These are my hobbies:  
  <ul>  
    <li>Watching soccer games</li>  
    <li>Watching movies</li>  
  </ul>  
</p>
```

```
<p>Best movies for me:  
  <ol>  
    <li>Star Wars I~III, Rouge one</li>  
    <li>Lord of the rings</li>  
    <li>Forrest Gump</li>  
  </ol>  
</p>
```

EXTERNAL CONTENTS: FILES

- Add files into html: <object>

```
<object data="map.pdf" width="150" height="200"></object>
```

- Data attribute: the address/path of the file or contents
- Type attribute: MIME type of the file. [Check here](#).
- Width, height: Size of the file or contents.
- Practice: add map of NIT Tsuyama
 - Create a word file in html workspace folder
 - Open homepage of NIT Tsuyama, open access page
 - Copy the map and paste into word file
 - Save the word file and re-save it as PDF
 - Use <object> to add it into html page, and adjust the size if you like.

EXTERNAL CONTENTS: VIDEOS

- Add and play videos: <video> element

- Video saved in local

```
<video src="empire.mp4" controls="controls" width="300" height="200"></video>
```

- Src attribute: the path of video file
 - Controls attribute: to show the buttons like [play] or [stop] etc.
 - Height, width: Size of the video window

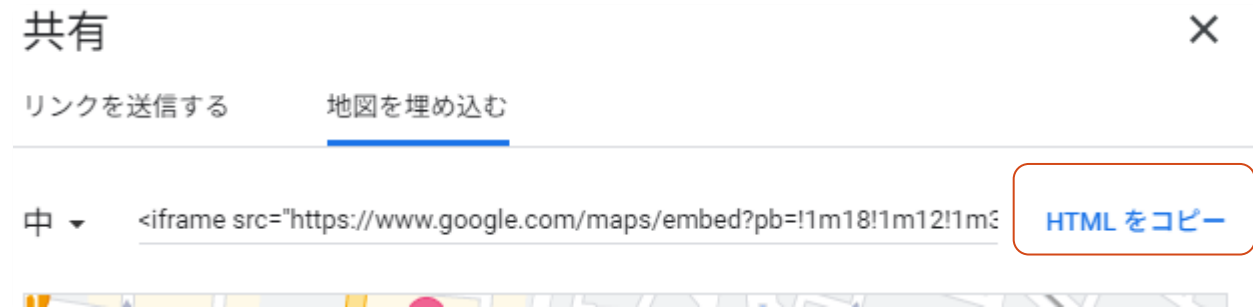

- Add Youtube videos

- Use <iframe> element
 - Embed another html page into current page.
 - Find a video and click [share] to get the URL and embed it.

```
<iframe width="560" height="315"
src="https://www.youtube.com/embed/dydhAi0A
3E?si=IA6Iv6d_RwYt5Eeh" title="YouTube video
player" frameborder="0"
allow="accelerometer; autoplay; clipboard-
write; encrypted-media; gyroscope; picture-
in-picture; web-share"
allowfullscreen></iframe>
```

EXTERNAL CONTENTS: GOOGLE MAP

- Use <iframe> to embed map from google
 - Open Google and find some place
 - Click [share], copy the html code
 - Paste it into your html file
 - Confirm it and adjust it with other text

REPORT 4TH / HOMEWORK

- Do the works below in group:
 - Make a **homepage to introduce your team**, which should include:
 - Name of team, image of team, your team's agenda...
 - Members as a list. Each member's name should be a link to his/her self introduction page.
- For Everyone:
 - Make a web page with title [My life in NIT, Tsuyama]
 - Write 200 words article and add it into the page.
 - Add an image into the page.
 - Use at least 8 types elements which are introduced in this lecture.
 - Add a link from your self introduction page to [My life in NIT, Tsuyama] page.
- **Submit all files as a zip file by group leader.**
